

EphMRA Online learning

The new online system for EphMRA has been developed by Create elearning and is based on an off the shelf system which has been part customised for EphMRA. This has saved a considerable amount of money for the Association but it does mean that there are a few points that each learner needs to be aware of. These do not affect the learning experience however.

1. In your dashboard if you click on my profile you see Change content to public and Financial overview in the drop downs – please ignore these.

2. In the Code of Conduct and AER training courses you may see the Finish button as shown on the left – please don't click on this as it takes you to the end of the course before you have done the training.

3. Under edit my profile please ignore the top box about defaults and instructor/partner.
